EXECUTIVE SUMMARY

Experienced **Pre-Sales Solution Architect** with over a decade of expertise designing, proposing, and delivering enterprise contact center and customer engagement solutions across banking, government, healthcare, and commercial sectors. Currently specializing in **cloud-based pre-sales solutioning**, he excels in analyzing customer operations, translating business requirements into scalable technical architectures, and supporting end-to-end pre-sales activities including presentations, demonstrations, RFP/RFI responses, proposals, and compliance documentation.

He has successfully designed omni-channel contact center solutions across on-premises, private, and public cloud environments, covering voice, social messaging, case management, and knowledge management platforms. With extensive experience engaging C-level stakeholders and cross-functional teams, he acts as a trusted technical advisor throughout the sales cycle. His strong delivery background further strengthens his pre-sales effectiveness, ensuring proposed solutions are practical, secure, and aligned with real-world implementation outcomes, driving win rates and long-term customer success.
