Candidate Summary

Gender:	Male
Nationality:	Singaporean
Status in Singapore:	Singaporean
Date of Birth:	
Notice Period:	Immediate
Total yrs of work exp:	20years
Highest Qualification:	Bachelor of Science in Computer and Data Telecommunication University of Guangxi, Guangxi province, China
Reason for Leaving:	Reorganization

Skills Verification

Cloud Native Architect (K8S, OCP, Tanzu, Docker, Automation Pipeline) ● Cloud Platform (AWS, GCP, Azure, OpenStack, CloudStack) ● Operation System (RHEL, Ubuntu, AIX, Solaris, Windows) ● Automation and Provisioning (Ansible, Terraform, git, Jenkins, Conco

Certified Kubernetes Security Specialist (CKS) 2022 ● Certified Kubernetes Administrator (CKA) 2021 ● Spring Certified Professional 2023 ● VMware Certified Professional – Tanzu for Kubernetes Operations 2023 ● VMware Certified Technical Associate – A

STEVEN LIANG

Gender: Male | Mobile: | _____

SENIOR CLOUD NATIVE ARCHITECT

With over 20 years of comprehensive experience in the IT industry, I bring a wealth of expertise in infrastructure, systems, and cloud technologies, including AWS, GCP, Azure, and a strong background in network, Linux/Unix, and storage systems.

In my most recent roles, I have transitioned my focus toward Cloud Native Architecture, gaining proficiency in cutting-edge technologies such as Kubernetes, Docker, automation pipelines, and related tools. This transition has been a natural evolution in my career, driven by a passion for staying at the forefront of technological advancements. I am proud to have played key roles in architecting solutions that leverage the benefits of cloud-native technologies.

Noteworthy is my proficiency in public cloud platforms, including AWS, GCP, and Azure. Additionally, I have hands-on experience in building on-prem cloud solutions with OpenStack and CloudStack. My expertise extends to VMware Tanzu product lines, where I have contributed to pre-sales and partner support capacities.

Looking forward, my career trajectory involves a strategic shift toward the exciting realms of Data, Machine Learning, and Artificial Intelligence. I am eager to bring my extensive IT background and cloud-native architecture skills into these evolving domains, contributing to and driving innovation in your esteemed organization.

AREA OF EXPERTISE:

- Cloud Native Architect (K8S, OCP, Tanzu, Docker, Automation Pipeline)
- Cloud Platform (AWS, GCP, Azure, OpenStack, CloudStack)
- Operation System (RHEL, Ubuntu, AIX, Solaris, Windows)
- Automation and Provisioning (Ansible, Terraform, git, Jenkins, Concourse CI pipeline)
- Database (PostgreSQL, MySQL, RDS, MongoDB)
- VMware Products (VMware vSphere, TKG, TMC, TO, TAS, TAP, Spring)

TECHNICAL PROFICIENCIES

- K8S: TKG, OCP, ClusterAPI, EKS, GKE, AKS
- Cloud: AWS, GCP, Azure, OpenStack, CloudStack
- Platform: TAS/PCF, TAP, Spring, VMware vSphere, Linux (Ubuntu, RHEL)
- DB: PostgreSQL, MySQL, MongoDB, RDS
- Language: bash, python, Spring (Java), perl, php, ansible, terraform, etc.

PROFESSIONAL EXPERIENCE

Broadcom, **Dec 2023 – Current**
Senior Solution Engineer - APJ
Transitioned to the role of Solution Engineer following VMware's acquisition by Broadcom, specializing in Tanzu solutions and delivering advanced Level 3 technical support to address complex customer needs.

VMware, **Jan 2023 – Dec 2023**
Technical Partner Development Evangelist - APJ
Since January 2023, my role has involved overseeing VMware Tanzu Partners in the APJ region. In this capacity, I provide training and support for VMware Tanzu products to enhance the capabilities of VMware Partners in APJ.

VMware, **Apr 2020 – Jan 2023**
Senior Solution Engineer - SEAK
In 2020, Pivotal was acquired by VMware. Following the acquisition, I joined VMware as a Senior Solution Engineer, undertaking a pre-sales role. In this capacity, I supported SEAK (South-East Asia and Korea) and concentrated on pre-sales support for Tanzu products.

Pivotal, **Dec 2019 – Apr 2020**
Senior Cloud Native Architect

I joined Pivotal as a Senior Cloud Architect, where my responsibilities included providing support for Pivotal Cloud Foundry (PCF) and Concourse CI. This role encompassed both pre-sales activities and 3rd-level backend support.

Gemalto Pte Ltd, **Aug 2017 – Dec 2019**
Cloud Automation Specialist
Gemalto, an internet security company renowned for its cybersecurity solutions, is the proud provider of acclaimed HSM and SAS technologies. During my tenure with the company, I played a pivotal role in establishing their production services platform on the AWS/GCP cloud.

My responsibilities encompassed utilizing infrastructure-as-code principles and finalizing automation procedures. Leveraging tools such as Terraform, AWS CloudFormation, and Ansible, I successfully built and maintained infrastructures in both AWS and GCP. Additionally, I actively supported developers in their daily activities, ensuring the seamless functionality of their development environments.

The core of my role revolved around overseeing the infrastructure of development, staging, and production environments, including the backend Database (RDS), ensuring their robust and continuous operation 24/7. This position epitomized a true DevOps role, distinguished by our commitment to using automation code to facilitate and enhance developer workflows, rather than relying on manual processes.

NYP, **Nov 2016 – Aug 2017**
Senior System Specialist
Join Nanyang Polytechnic (NYP) www.nyp.edu.sg as a senior system specialist and take care of NYP infrastructure and production systems. Work as NYP HPC administrator.

NEC APAC, **Nov 2014 – Nov 2016**
Senior Unix Engineer
Joined NEC APAC as a Project Manager, tasked with delivering multi-vendor Unix-based solutions for corporate clients. In this role, I successfully managed several key projects:

1. NOL’s Logistic SuperSuite (LSS) Project:
   - Objective: To replace the legacy system with Linux solutions.
2. Mizuho Bank’s G3 Project:
   - Objective: Implementation of the Solaris platform and systems.
3. IDA Unique Authentication System (UAS) Upgrade Project:
   - Objective: Enhancing and upgrading the IDA Unique Authentication System.

These projects involved intricate coordination, effective communication, and successful execution of strategies to meet the specific requirements of each client. Through diligent project management, I ensured the timely delivery and high-quality implementation of Unix-based solutions for our valued corporate clients.

BANK OF TOKYO MITSUBISHI UFJ (BTMU), **Nov 2012 – Nov 2014**
System Support
As part of the G3 project for the Bank of Tokyo Mitsubishi UFJ (BTMU), I played a pivotal role in managing IBM pServer and associated products, including EMC storage and IBM MQ software. Additionally, my responsibilities extended to project management.

In this capacity, I took charge of overseeing BTMU's production infrastructure servers, covering critical elements such as DNS, DHCP, Backup, DR, and Cluster, all operating on AIX/Linux platforms. My duties also included active involvement in data center migration activities.

Throughout this engagement, I applied my expertise to ensure the seamless operation and efficient management of BTMU's infrastructure, contributing to the success of the G3 project and the overall stability of its production environment.

JUMP TRADING LLC, **Sep 2011 – Nov 2012**
Senior System Support
Look after Jump Trading production price fee servers and trading servers in Asia colo (, Japan, Korea). Work with a team in Chicago to build a trading platform. Also involved in HPC + virtualization + real-time Linux kernel testing project.

The following techniques were involved:

- Ubuntu server installation, PXE boot Installation for Linux, Configuration
- VMWare virtualization solution for HPC
- LVM2 management (Create, Extend, Reduce, Remove, etc.)
- VCS clustering for Linux (Installation, Setup, Configuration, Troubleshooting, and Management)
- NetApp storage and MPIO for Linux (Installation, Configuration, and Troubleshooting)
- Sybase ASE database for Linux (Installation, Configuration, DB build, and normal maintenance)
- MySQL database (Installation, Configuration, DB build, and normal maintenance)
- InfiniBand Network (basic knowledge of Infiniband in Linux, OFED driver, OpenSM)
- Linux Real-Time Kernel configuration, compiling, tuning… …
- Linux Central Management Solution (Zabbix, Splunk, git, CF engine)
- Script code (bash/ksh, Perl, PHP)
- Bind (DNS service), NFS, DHCP, LDAP, etc. normal Unix enterprise daily service support
- Cisco devices level one support (e.g. IOS config, interface setup, connectivity testing…)
- A lot… a lot…

STANDARD CHARTERED BANK, **Jul 2007 – Sep 2011**
Unix Team Leader
Act as UNIX team leader to maintain SCB UNIX servers (AIX and RedHat Linux). Perform Linux, AIX, and IBM virtualization design, planning, installation, upgrade, and daily maintenance. Lead the team working with other teams to keep SCB production running 24x7. Participate in system integration projects and provide system support for new systems development.

Look after a new production environment in SCB, which is a GRID computing network using DataSynapse Grid Server running in Linux and Windows mass servers. Provide installation, setup, daily maintenance, and cluster applets distribution services, etc.

Key Achievements:

- Join SCB/AEB system merge project, after SCB acquired AEB private banking in 2009. Provide IBM virtualization, AIX, and Linux support in the project. This is the biggest project in SCB in over 20 years online in 2010.
- Join lots of SCB projects and provide UNIX system support.
- Led the team to keep SCB production running 24x7.

The following techniques were involved:

- Redhat Linux platform support + kickstart maintenance
- IBM pServers, PowerVM, AIX
- HDS HDLM for Linux and AIX
- DataSynapse Grid Server v5.5
- VMware Virtualization Products
- Unix Centralization Management Solution (NIS, LDAP, HP OpenView, Privilege Manager for Unix)
- A lot a lot… …

S&I SYSTEM PTE LTD, **Feb 2006 – Jul 2007**
Senior System Specialist
S&I is a major IBM distribution partner in the Asia Pacific. Join S&I to provide IBM software, AIX, and virtualization support for S&I customers. Perform lots of projects in multination banks.

Key Achievements:

- Build Fortis Bank production system with IBM WAS, MQ, and Odyssey banking system in AIX servers, those are running in the HACMP environment.
- Build a DR system for PowerSeraya SAP production in HACMP/XD

- Perform lots of projects, doing AIX installation, upgrading, system troubleshooting, etc.

IBM, Shanghai, China **Mar 2003 – Feb 2006**
Senior Tivoli Specialist
Join IBM China Software Group (SWG). Act as an IBM Tivoli product specialist looking after Tivoli System Management products (ITM, TEC, NetView. TSM). Provide post-sale services like system planning, project design, software installation, Tivoli product troubleshooting, etc. to IBM customers in China. Sometimes provide Tivoli product technical pre-sales services to customers with IBM sales together. Most of China IBM major customers, like banks, are using AIX as their OS, so sometimes will help IBM customers with AIX troubleshooting, but the major is focused on Tivoli support.

Key Achievements:
- Build CCB (China Construction Bank) Tivoli Monitoring system to monitor thousands of CCB production servers in China. This is a huge project. It takes over 5 years to finish it. I take part in the following Tivoli products implementation: ITM, TEC, and NetView
- Implement the China Foreign Exchange Center (CFEC) Tivoli monitoring upgrade project.
- I passed IBM DB2 and WAS certifications.

CHINA TELECOM, Guangzhou, China **Jul 2001 – Mar 2003**
Technician
Join Guangzhou China Telecom Company. Act as a technician who performs daily data network maintenance, and project engineering. Act as an operator monitor production network.

Key Achievements:
- Passed CCNA, CCNP, and CCDP certification.

EDUCATION AND CREDENTIALS

Bachelor of Science in Computer and Data Telecommunication
University of Guangxi, Guangxi province, China

Professional Certifications:
- Certified Kubernetes Security Specialist (CKS) 2022
- Certified Kubernetes Administrator (CKA) 2021
- Spring Certified Professional 2023
- VMware Certified Professional – Tanzu for Kubernetes Operations 2023
- VMware Certified Technical Associate – Application Modernization 2023
- VMware Certified Professional Data Center Virtualization 2021
- VMware Certified Professional Network Virtualization 2021
- Google Cloud Certified Professional Cloud Architect 2021
- AWS Certified Solutions Architect - Associate Certificate 2020
- IBM Certified Database Associate -- DB2 UDB V8.x Family 2004
- IBM Certified DBA -- DB2 UDB V8.x for LINUX UNIX and Windows 2004
- IBM Certified System Administrator -- WebSphere Application Server V5.x 2004
- IBM Certified Advanced Technical Expert (IBM CATE)- pSeries and AIX 2003
- IBM Certified Systems Expert – High Availability for AIX Technical Support & Admin
- CCNA & CCDP & CCNP 2002-2004
- Agilent NetMetrix/UX Certification 2000
- CA GO FOR IT Certification 1999
